Bag in the Box

Bonar Plastics' Bag In The Box (BIB) is the best choice for safe, simple and sanitary storage and transport of non-regulated liquids. Sturdy, double-wall, foam-filled construction will withstand years of closed loop trips. The Bonar BIB is far more sanitary than porous cardboard and is the best way to bring in fresh milk, cream, and eggs to cheese, ice cream, or dairy processing plants. The Bonar BIB is also ideal for storing and transporting whey concentrates, salad dressings, marinades, sauces, fat and oils, juice and syrups. Other uses include applications in the pharmaceutical industry and storing and transporting of soaps.

Every Bonar BIB is molded of USDA/FDA approved polyethylene to ensure sanitary handling every time.

The disposable, 2-ply liner is Dairy and Kosher approved. A new liner each time enables one container the versatility by being used for sweet, savory or spicy with no flavor transfer. (Liners available directly from the manufacturer.)

BIB Features:

- USDA/FDA Approved
- 2" thick polyurethane foam insulation
- Sloped bottom for complete drainage
- 4-way forklift/pallet entry
- Stackable 2 high
- 2" reusable discharge valve
- Smooth interior for easy cleaning

Liner Features:

- 2" filler spout attached
- FDA Material
- Completely disposable
- Dairy and Kosher approved

Uses:

- Liquid Egg
- Edible Oils
- Juices
- Dairy Products
- Liquid Fat
- Syrups
- Pharmaceuticals
- Soaps

Safe

New corner tie downs are easy-to-sanitize rubber that keeps lid in place during transport.

IB 1645 is the industry choice for the safe storage and transport of non-regulated liquids.

No refrigeration needed for short trips thanks to 2" thick polyurethane insulation filling all four box sides, the bottom, legs, and lid.

The 48" x 44" x 49" BIB dimensions allows for economical outbound and return shipments.

Simple

Attach the reusable 2" valve and tap into the liner in one easy step. The large 3-1/4" knob makes it simple to control discharge. Sloped bottom assures complete drainage.

Sanitary

A sanitary fill every time with low cost, pillow form-fitting dairy and kosher-approved 2-ply disposable liner

Reusable valve is easy to clean

IB 1645 is molded of USDA/FDA approved polyethylene
