

SPIIL-TAINER™

The Bonar line of Spill Containers meet or exceed all regulations for secondary containment.

Bonar's Spil-tainers are specially designed to contain spills and leaks from 55 gallon drums. They effectively contain drops and spills from drum filling operations and/or spills and leakage during in-plant transport and storage.

They help protect personnel, work areas, soil and ground water when containing regulated liquids. All units meet or exceed all EPA and regulatory requirements for secondary containment.

- EPA 40 CFR 264.175 guidelines.
- Molded entirely out of chemical and impact resistant polyethylene.
- Reinforced design and one-piece seamless construction provides long lasting, heavy duty usage.
- Molded-in locator ring on bottom interior ensures seating of drums.
- Extra-high wall for maximum containment.
- Ultra-smooth surfaces for easy cleaning.
